## Track Notes

### Track Notes:

Due to the variations in the accuracy of vehicle trip meters, or if tyre size has been changed on your vehicle, some trip notes readings may vary from the readings from your trip meter. To get the most accurate readings, you may need to reset your trip meter at each intermediate point.

Location coordinates are the end of the particular section, except for start coordinate.

Datum is Australian Geocentric 1994 (GDA94)

These trip notes should be used in conjunction with the recommended maps for each route.

Note: There may be river and creek crossings in this route. Ensure that you check the depth of crossings before entering, and that your vehicle is properly prepared for the water crossing.

Some tracks in these routes are on tracks that are subject to seasonal closures (SSC), other tracks may be closed for maintenance or other reasons. Visit the Parks Victoria Four Wheel Driving Activities homepage to check on information regarding track closures and other information on the area you intend visiting
